

Develop Hybrid Mobile Applications with Apache Cordova & PhoneGap Enterprise

Andrew Savory | Mobile Services and Solutions Evangelist, Adobe

ACM Learning Center

http://learning.acm.org

- 1,400+ trusted technical books and videos by leading publishers including O'Reilly, Morgan Kaufmann, others
- Thousands of short IT and desktop videos covering the latest toolkits and software for "on-the-job" problem solving
- Online courses with assessments and certification-track mentoring, member discounts on tuition at partner institutions
- Learning Webinars on big topics (Cloud/Mobile Development, Cybersecurity, Big Data, Recommender Systems, SaaS, Agile, Machine Learning, NLP, Hadoop Parallel Programming, etc.)
- ACM Tech Packs on top current computing topics: Annotated Bibliographies compiled by subject experts
- Popular video tutorials/keynotes from ACM Digital Library, A.M. Turing Centenary talks/panels
- Podcasts with industry leaders/award winners

Agenda

- What are hybrid mobile applications?
- Introduction to Apache Cordova and PhoneGap
- Introduction to PhoneGap Enterprise

Types of mobile application

NATIVE CROSS-PLATFORM HYBRID WEB

http://www.developereconomics.com/pros-cons-top-5-cross-platform-tools/

What are hybrid applications?

Mobile apps – written in web tech you know and love

Native enough to be submitted to app store(s)

Native enough to provide access to device APIs

PhoneGap vs Apache Cordova

The PhoneGap Framework

- A PhoneGap project
- PhoneGap CLI
- PhoneGap Desktop App
- PhoneGap Developer App
- PhoneGap Build
- PhoneGap Enterprise

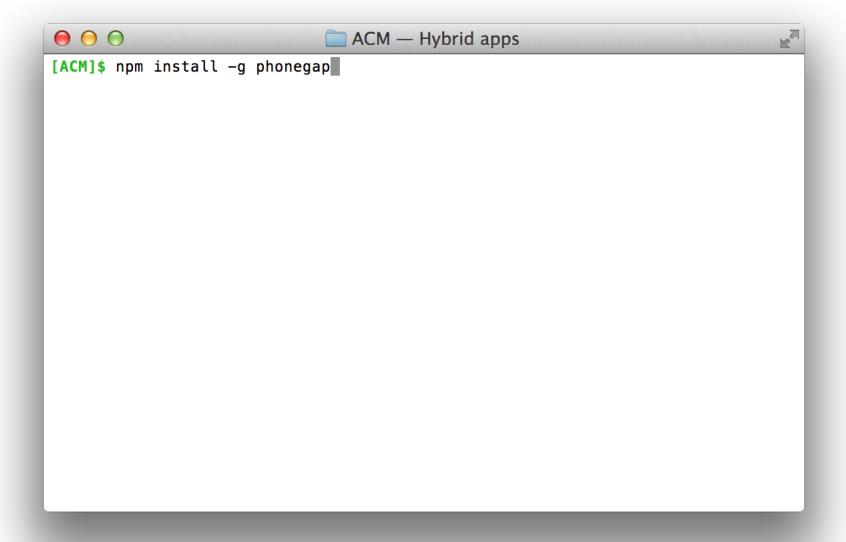

Installation prerequisites

http://www.nodejs.org

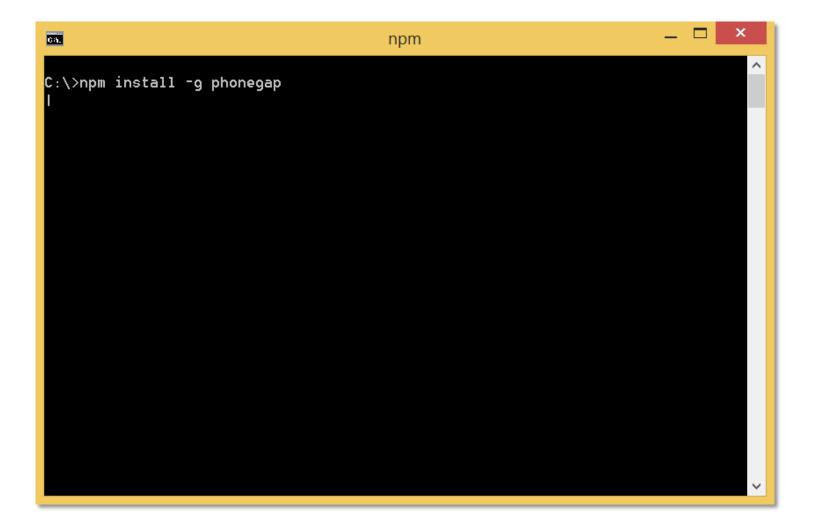

"Node.js is an open source, cross-platform runtime environment for server-side and networking applications. Node.js applications are written in JavaScript, and can be run within the Node.js runtime on OS X, Microsoft Windows, Linux and FreeBSD."

Installation

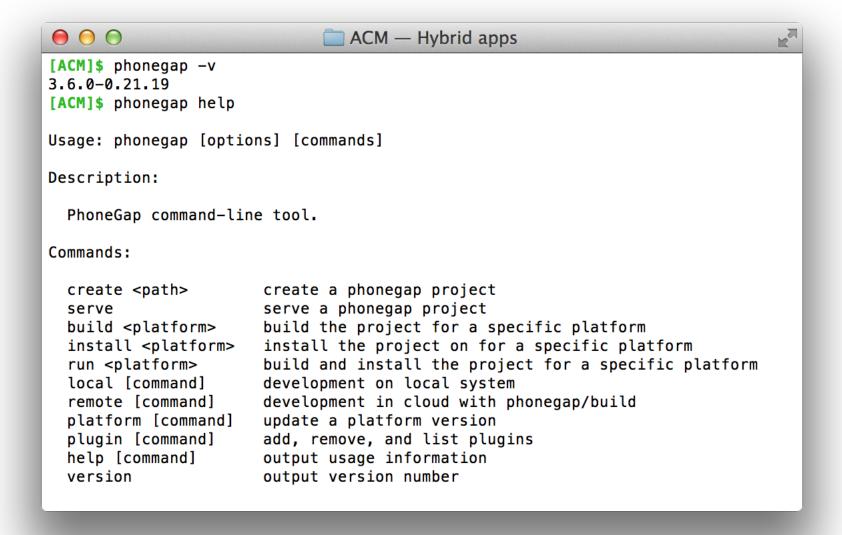

Installation

Getting Started

Hello World

```
ACM — Hybrid apps
[ACM] $ phonegap create acm-demo
[phonegap] create called with the options /Users/asavory/ACM/acm-demo com.phoneg
ap.helloworld HelloWorld
[phonegap] Customizing default config.xml file
[phonegap] created project at /Users/asavory/ACM/acm-demo
[ACM] $ ls acm-demo/
config.xml hooks
                     platforms plugins
                                          WWW
[ACM]$
```

Anatomy of a PhoneGap application

```
The project called "acm-demo"

|-----hooks/ Task hooks for power users

|-----platforms/ Native platform projects

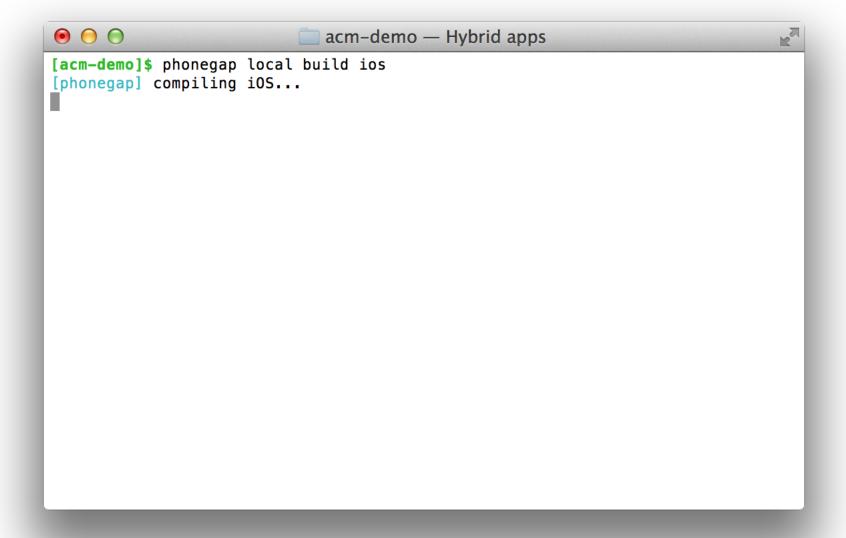

|-----plugins/ Your installed plugins

|----www/ Your web application

|----config.xml App configuration
```

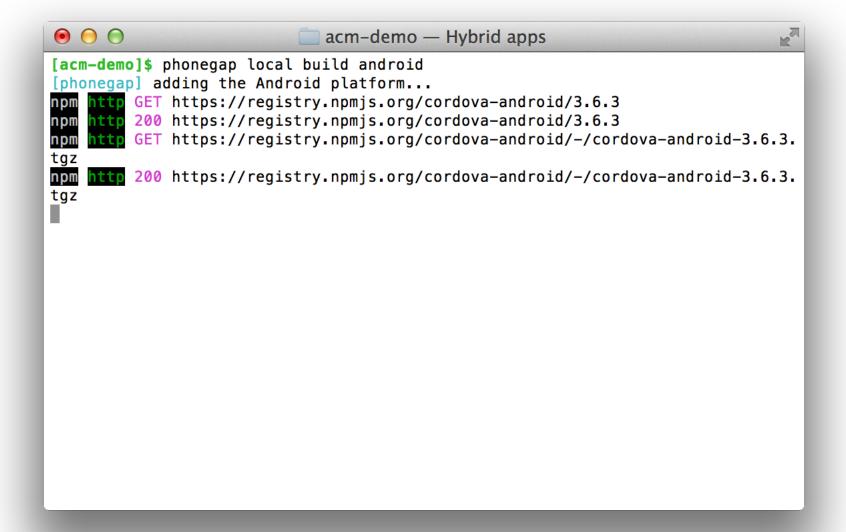

Adding platforms

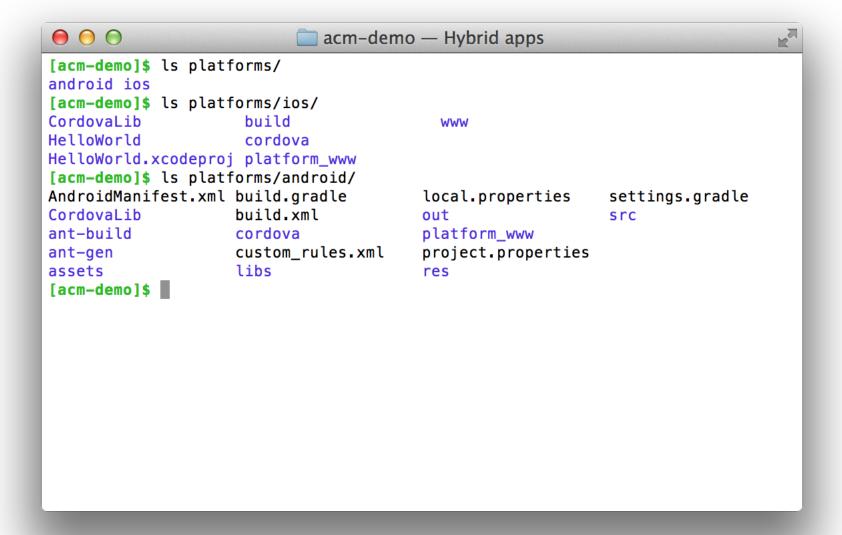

Adding platforms

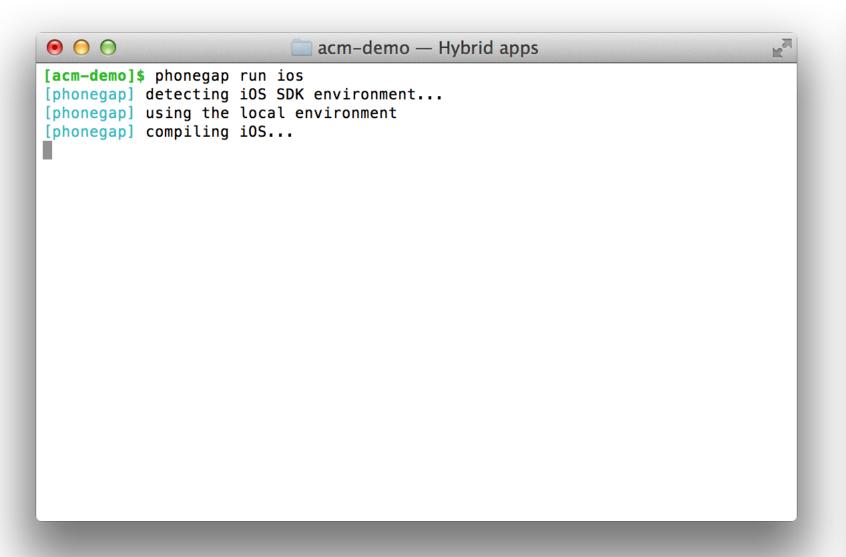

Platforms

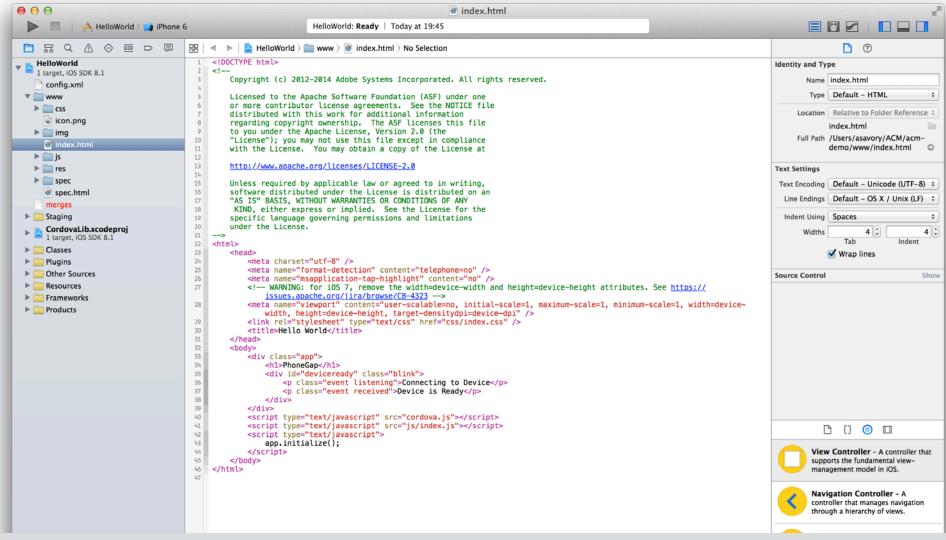

Running the app

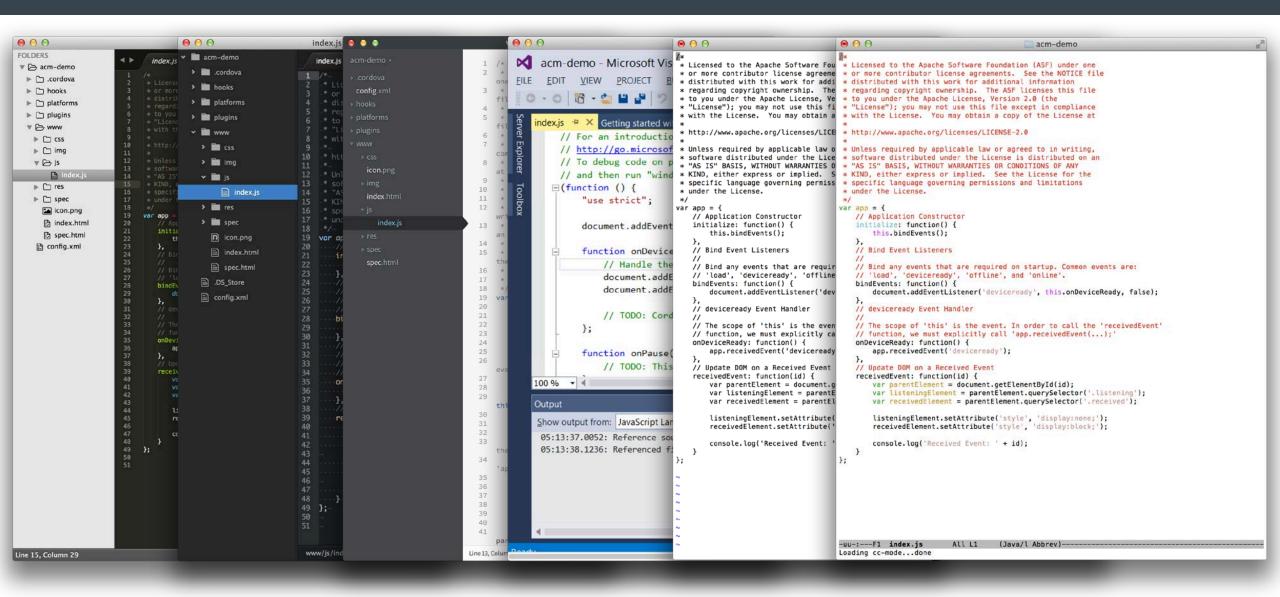

Native SDK tooling

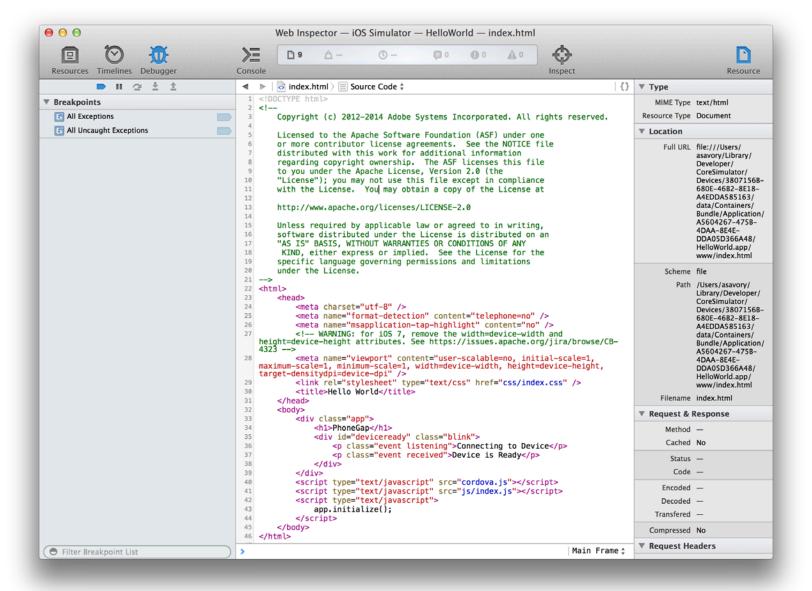

cd acm-demo; phonegap build ios && open -a xcode platforms/ios/HelloWorld.xcodeproj

IDEs

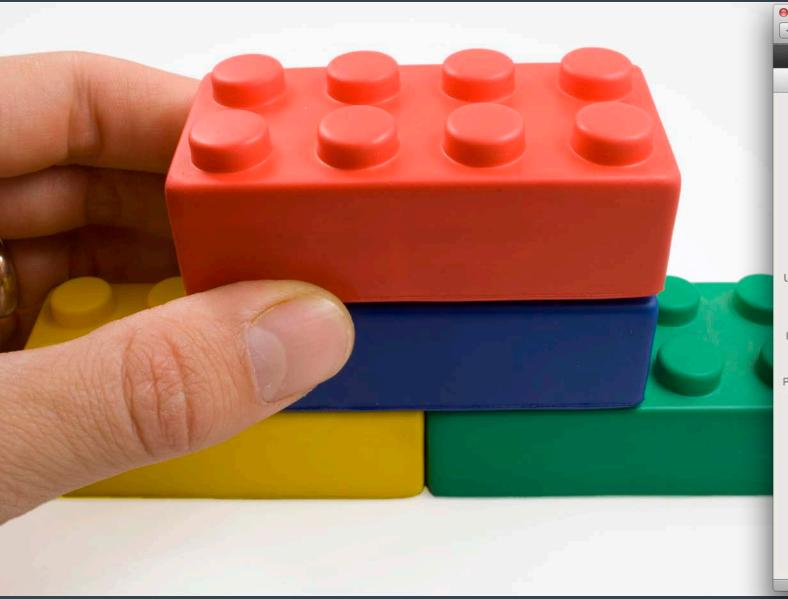

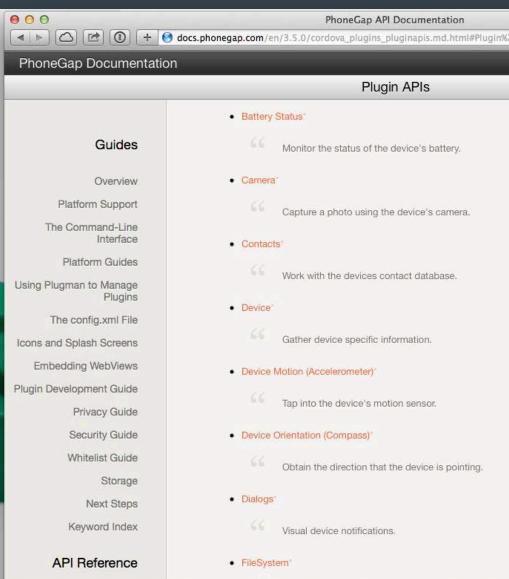

Debugging

Plugins

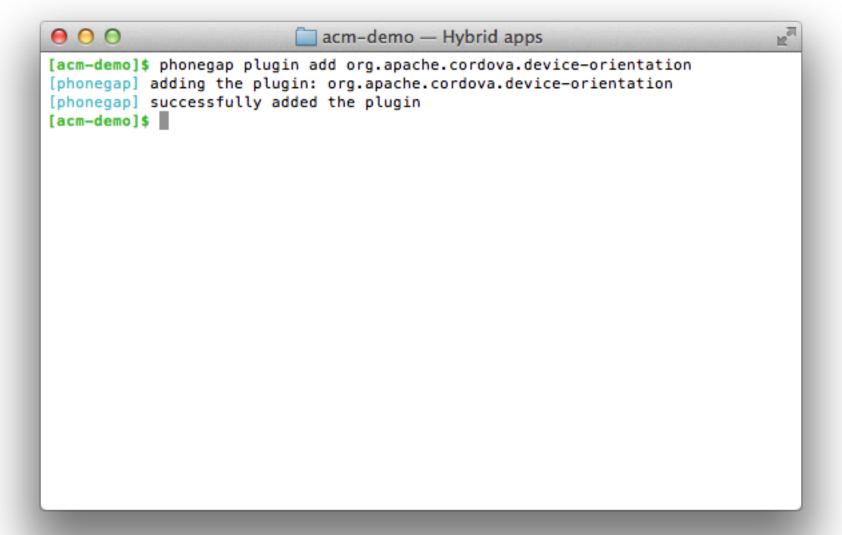

The native approach

```
async private void ReadingChanged(object sender, CompassReadingChangedEventArgs e)
{
    await Dispatcher.RunAsync(CoreDispatcherPriority.Normal, () =>
    {
        CompassReading reading = e.Reading;
        ScenarioOutput_MagneticNorth.Text = String.Format("{0,5:0.00}", reading.HeadingMagneticNorth);
        if (reading.HeadingTrueNorth != null)
        {
            ScenarioOutput_TrueNorth.Text = String.Format("{0,5:0.00}", reading.HeadingTrueNorth);
        }
        else
        {
            ScenarioOutput_TrueNorth.Text = "No data";
        }
    });
});
}
```

```
private SensorManager mSensorManager;
private Sensor mSensor;
...
mSensorManager = (SensorManager) getSystemService(Context.SENSOR_SERVICE);
mSensor = mSensorManager.getDefaultSensor(Sensor.TYPE_ORIENTATION);
```

Plugins

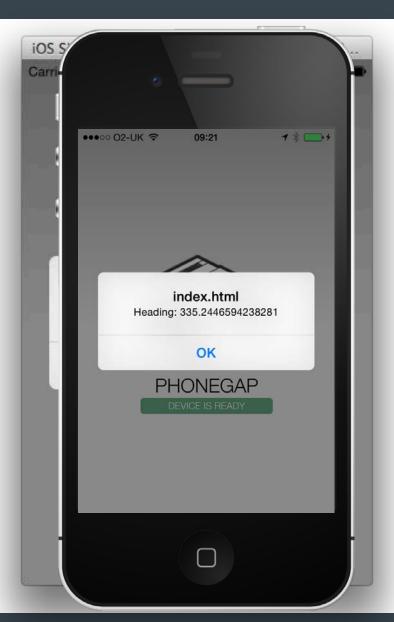

Using Plugins: Compass

phonegap plugin add org.apache.cordova.device-orientation

```
onDeviceReady: function() {
35
36
            app.receivedEvent('deviceready');
37
            navigator.compass.getCurrentHeading(app.onSuccess, app.onError); =
38
        }, ¬
39
        onSuccess: function(heading) { -
40
41
            alert('Heading: ' + heading.magneticHeading); -
42
43
        onError: function(error) {
45
            alert('CompassError: ' + error.code);
        }, ¬
```

More Plugins

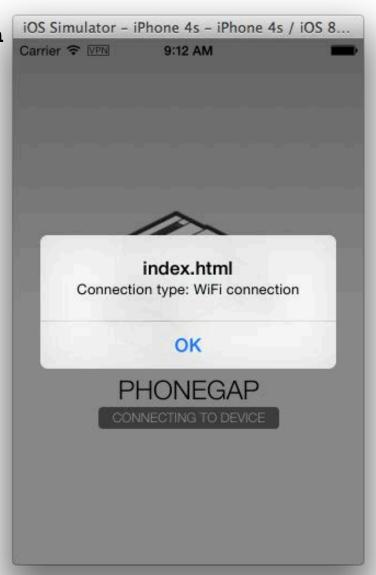

```
\Theta \cap \Theta
                           acm-demo — Hybrid apps
[acm-demo] $ phonegap plugin add org.apache.cordova.device-orientation
[phonegap] adding the plugin: org.apache.cordova.device-orientation
[phonegap] successfully added the plugin
[acm-demo] $ ls plugins/
org.apache.cordova.device-orientation
[acm-demo]$ phonegap plugin add org.apache.cordova.camera
[phonegap] adding the plugin: org.apache.cordova.camera
[phonegap] successfully added the plugin
[acm-demo]$ phonegap plugin add org.apache.cordova.device
[phonegap] adding the plugin: org.apache.cordova.device
[phonegap] successfully added the plugin
[acm-demo] phonegap plugin add org.apache.cordova.network-information
[phonegap] adding the plugin: org.apache.cordova.network-information
[phonegap] successfully added the plugin
[acm-demo] $ ls plugins/
org.apache.cordova.camera
                                       org.apache.cordova.device-orientation
                                       org.apache.cordova.network-information
org.apache.cordova.device
[acm-demo]$
```

Using Plugins: Network Information

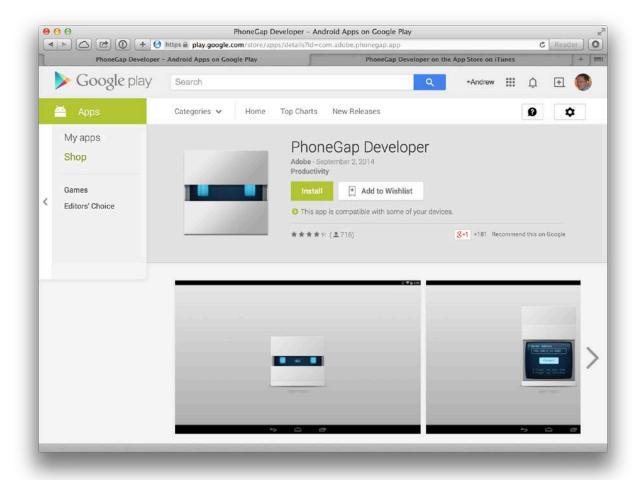

phonegap plugin add org.apache.cordova.network-information

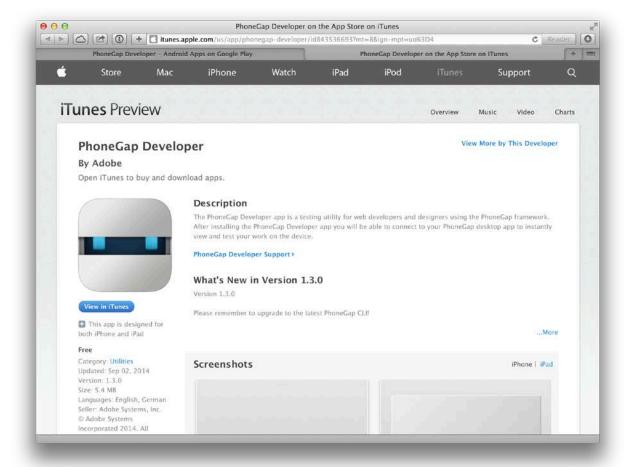

```
onDeviceReady: function() {
            app.receivedEvent('deviceready');
36
            app.checkConnection();
        }, •
        checkConnection: function() {
            var networkState = navigator.connection.type;
43
            var states = {};
            states[Connection.UNKNOWN] = 'Unknown connection':
45
            states[Connection.ETHERNET] = 'Ethernet connection';
            states[Connection.WIFI]
                                        = 'WiFi connection';
            states[Connection.CELL_2G] = 'Cell 2G connection';
            states[Connection.CELL_3G] = 'Cell 3G connection';
49
            states[Connection.CELL_4G] = 'Cell 4G connection';
            states[Connection.CELL]
                                        = 'Cell generic connection';
            states[Connection.NONE]
                                        = 'No network connection':
            alert('Connection type: ' + states[networkState]);
54
        },
```

PhoneGap Developer App

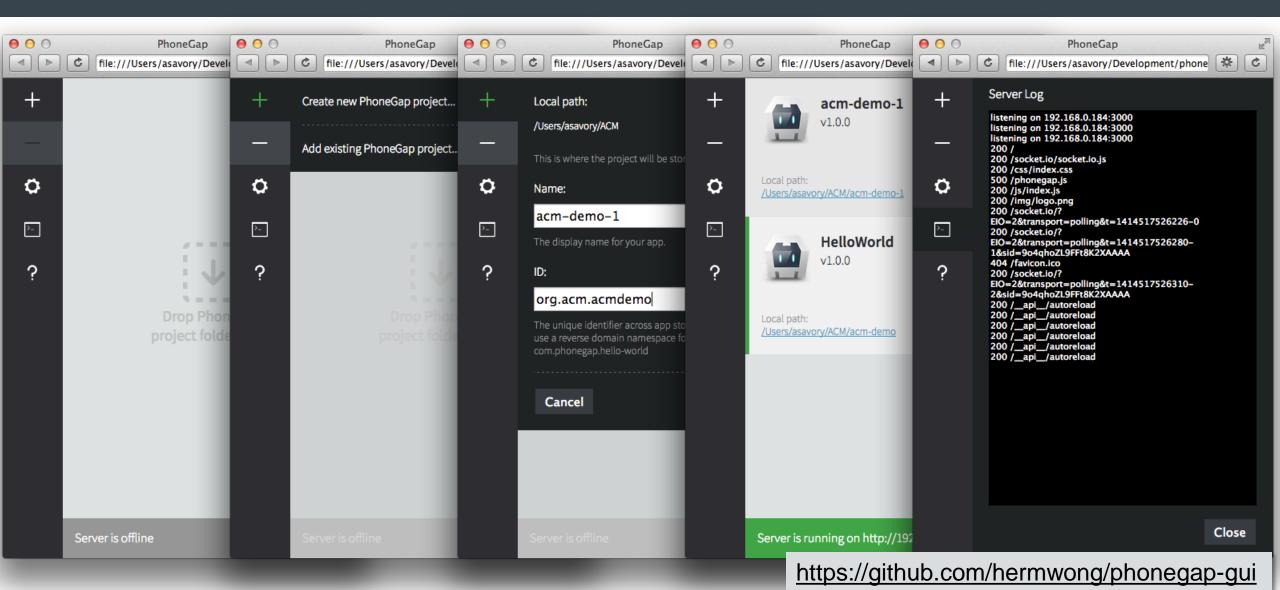

PhoneGap Developer App

```
0 0
                            acm-demo — Hybrid apps
[acm-demo]$ phonegap serve
cp: no such file or directory: /Users/asavory/ACM/acm-demo/icon.png
[phonegap] starting app server...
[phonegap] listening on 192.168.0.184:3000
[phonegap]
[phonegap] ctrl-c to stop the server
[phonegap]
```

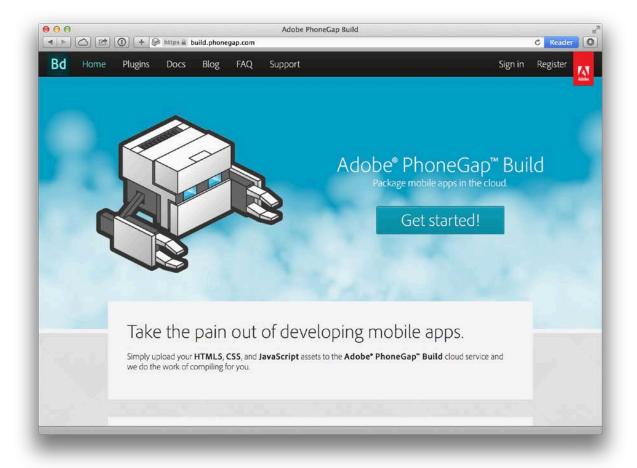

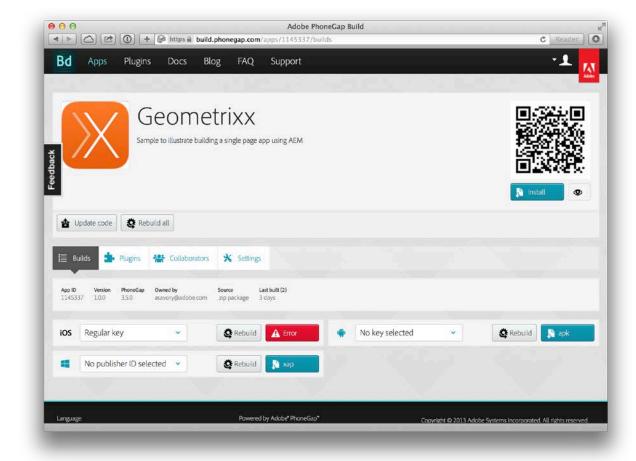

PhoneGap Desktop App

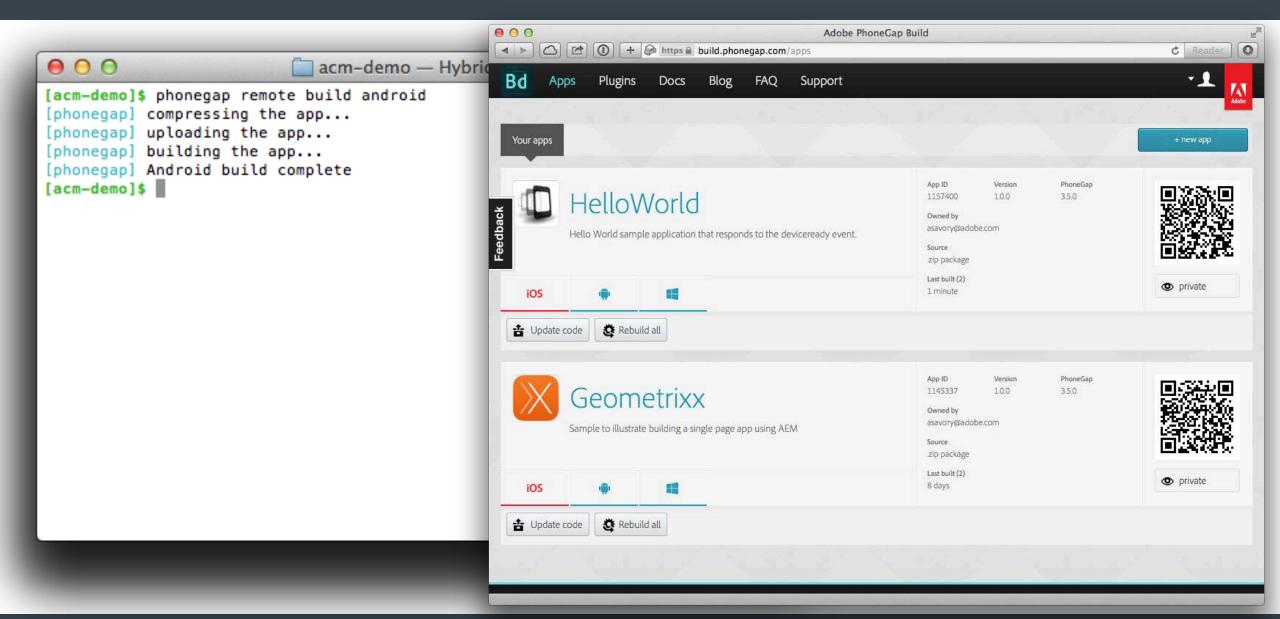

PhoneGap Build

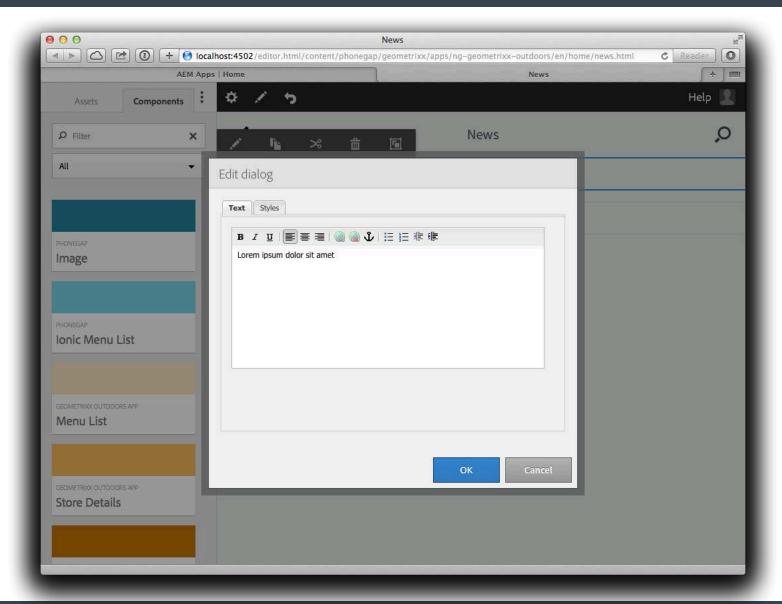

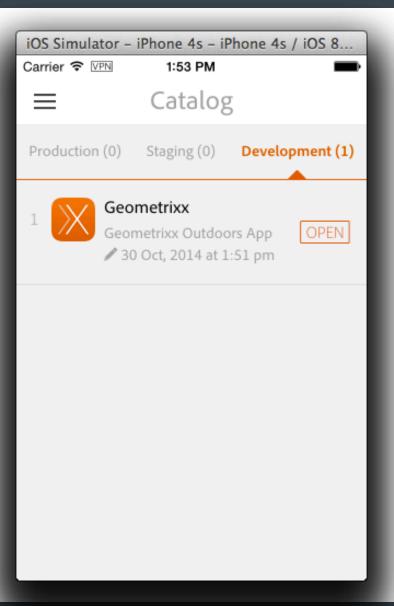

Build in action

PhoneGap Enterprise
